CRM Application For Jewel Management

Salesforce

Introduction:

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these questions, then you're in the right place. This module is for you.
Welcome to Salesforce! Salesforce is game-changing technology, with a host of productivity-boosting features, that will help you sell smarter and faster. As you work toward your badge for this module, we'll take you through these features and answer the question, "What is Salesforce, anyway?".

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.
Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud.
So what does that really mean? Well, before Salesforce, your contacts, emails, follow-up tasks, and prospective deals might have been organised something like this:

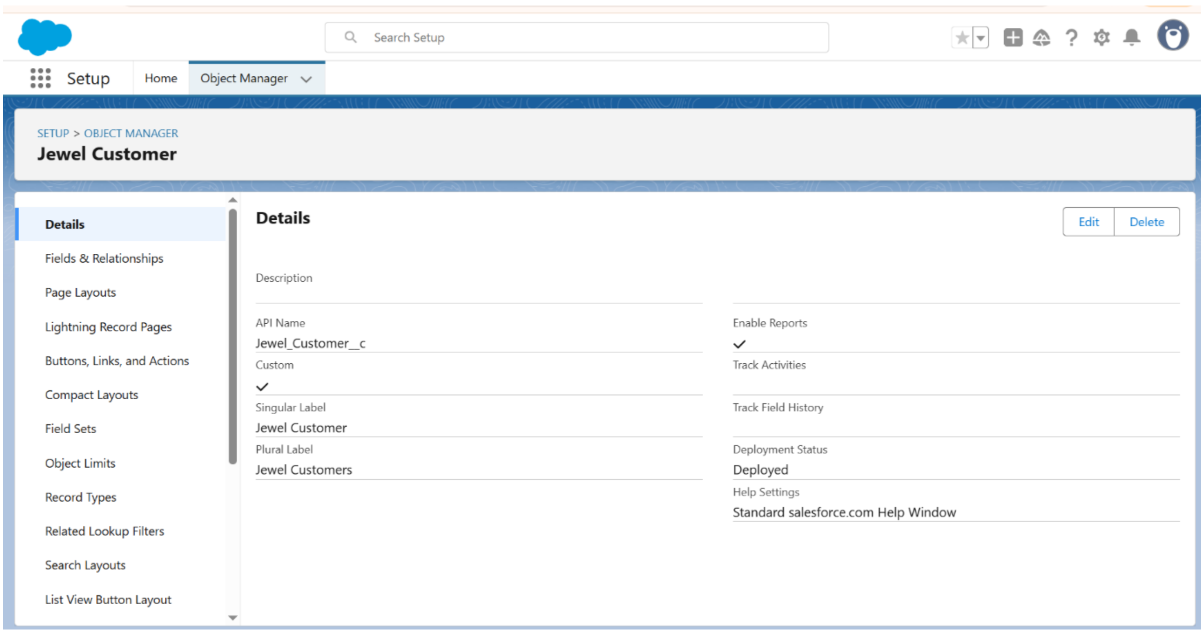
MILESTONE-2

Object

Create Jewel Customer Object

The purpose of creating a Jewel Customer custom object is to store and manage information about Customer.
To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
2. Enter the label name >> Jewel Customer
3. Plural label name >> Jewel Customers
4. Enter Record Name Label and Format
    - Record Name >> Customer name
    - Data Type >> Text
5. Click on Allow reports.
6. Allow search >> Save.



Create Item Object

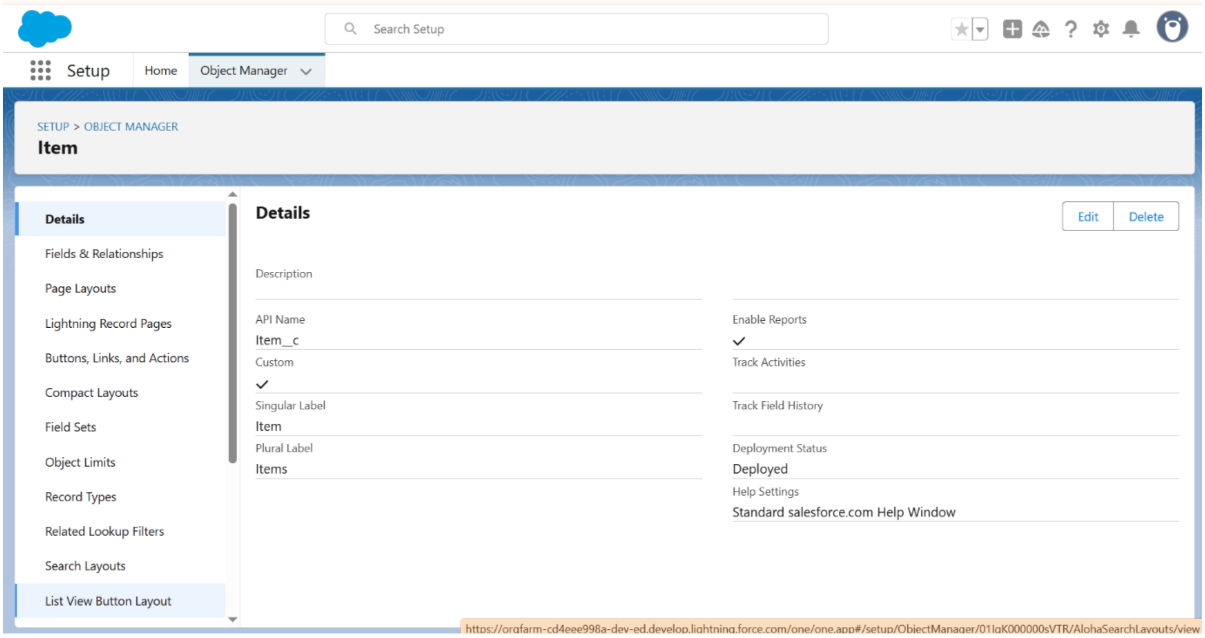
The purpose of creating a Item object is to manage the inventory of gold and silver items.

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.

1. Enter the label name >> Item
2. Plural label name >> Items
3. Enter Record Name Label and Format
   - Record Name >> Item Id
   - Data Type >> Auto Number
   - Display Format >> Item-{00}
   - Starting Number >> 1

2. Click on Allow reports.
3. Allow search >> Save.



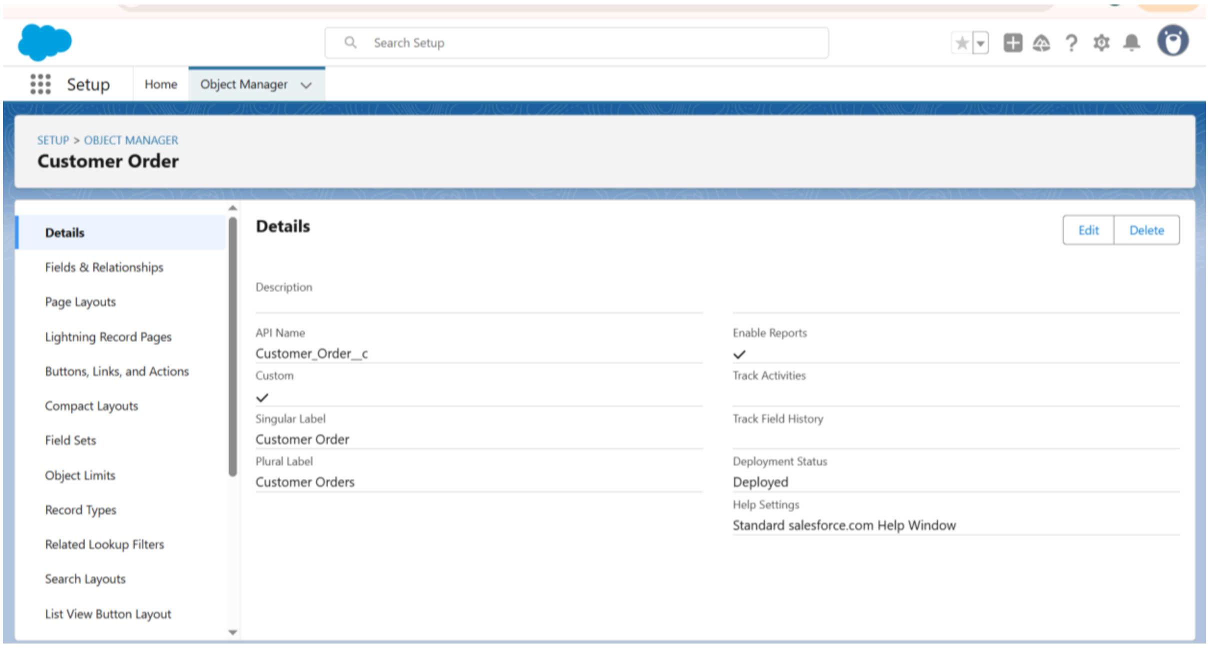
Create Customer Order Object

The purpose of creating a Item object is to manage the inventory of gold and silver items.

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
   1. Enter the label name >> Customer Order
   2. Plural label name >> Customer Orders
   3. Enter Record Name Label and Format
      - Record Name >> Customer Order No
      - Data Type >> Auto Number
      - Display Format >> Order - {0000}
      - Starting Number >> 1

2. Click on Allow reports.
3. Allow search >> Save.

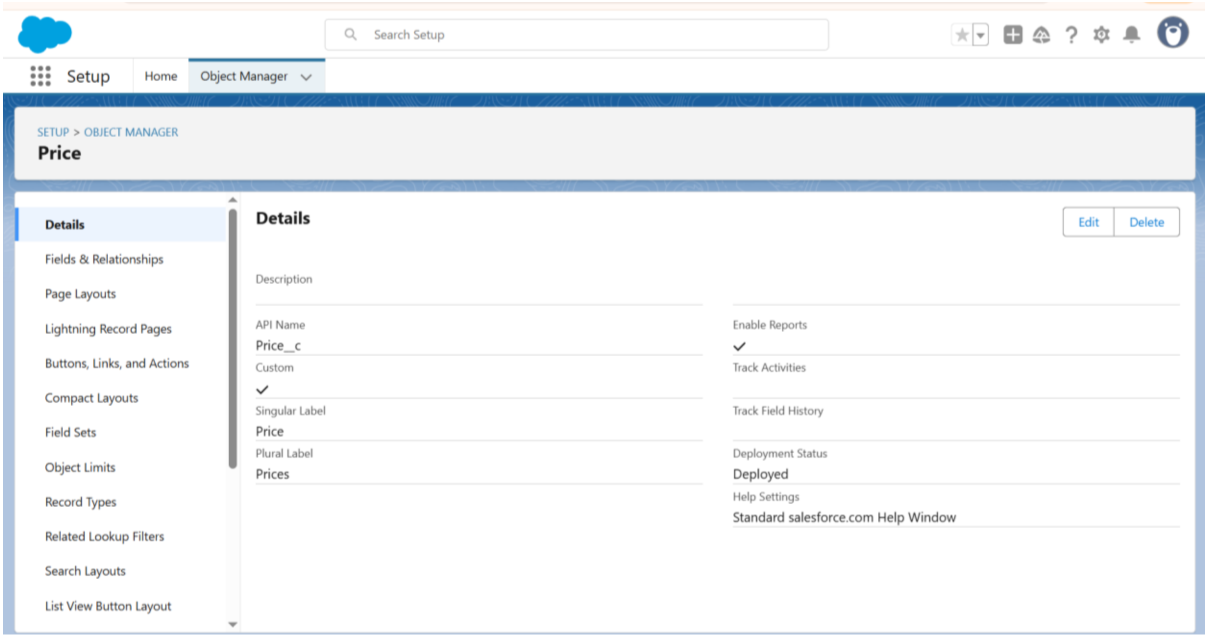


Create Price Object

The purpose of creating a Item object is to manage the inventory of gold and silver items.

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
    1. Enter the label name >> Price
    2. Plural label name >> Prices
    3. Enter Record Name Label and Format
        - Record Name >> Item Price
        - Data Type >> Text
2. Click on Allow reports.
3. Allow search >> Save.



Create Billing Object

The purpose of creating a Item object is to manage the inventory of gold and silver items.

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
    1. Enter the label name >> Billing
    2. Plural label name >> Billings
    3. Enter Record Name Label and Format
        - Record Name >>Billing Name
        - Data Type >> Text
2. Click on Allow reports.
3. Allow search >> Save.

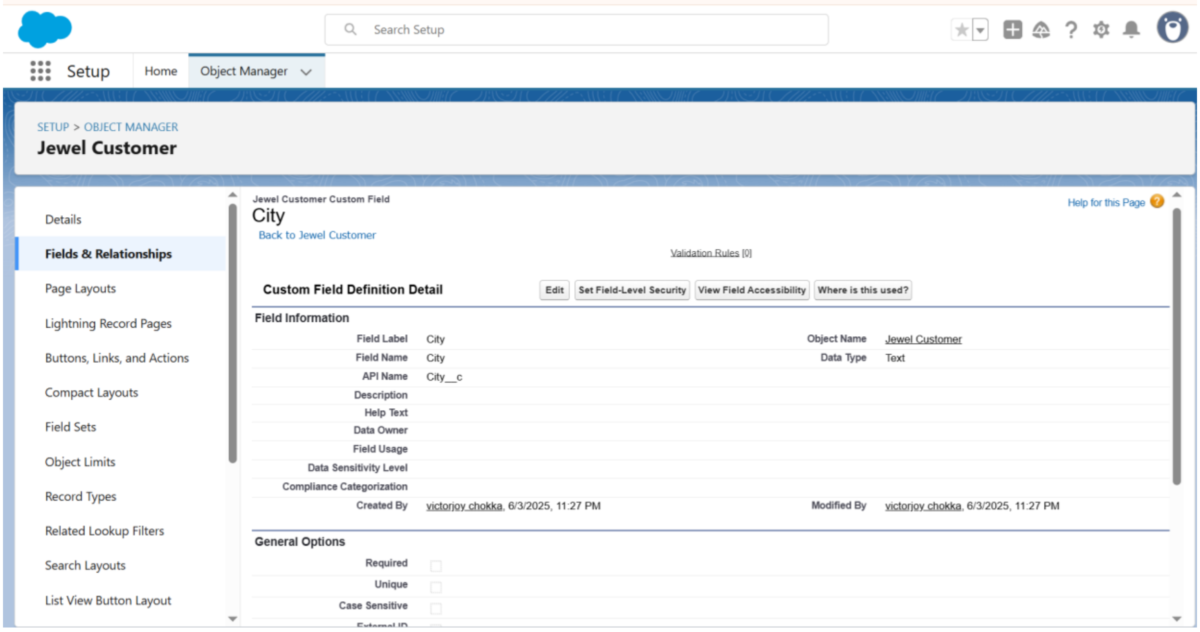
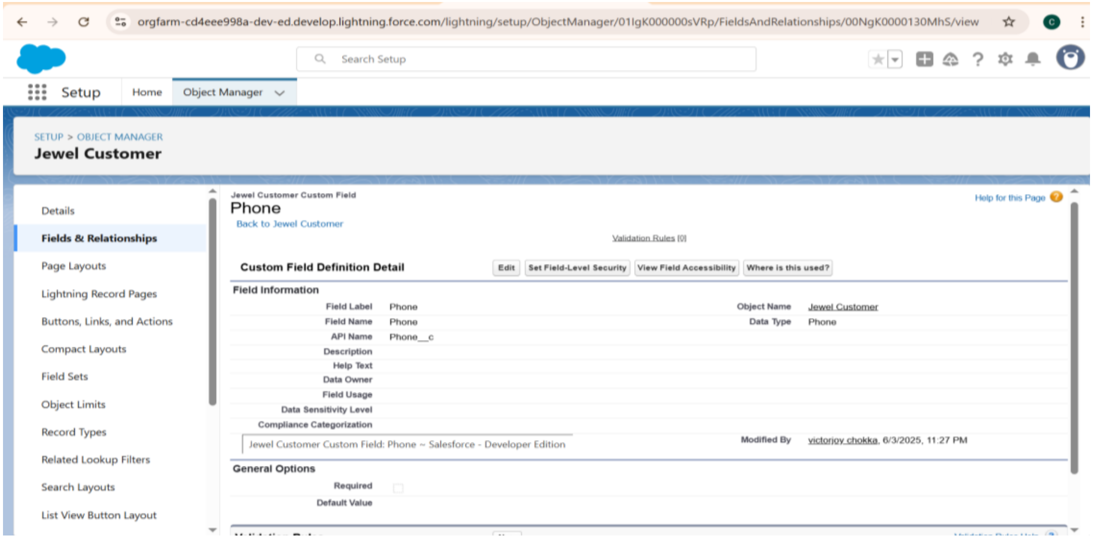
   - Click on Next >> Next >> Save and new.



Creating the Phone field in object Jewel Customer

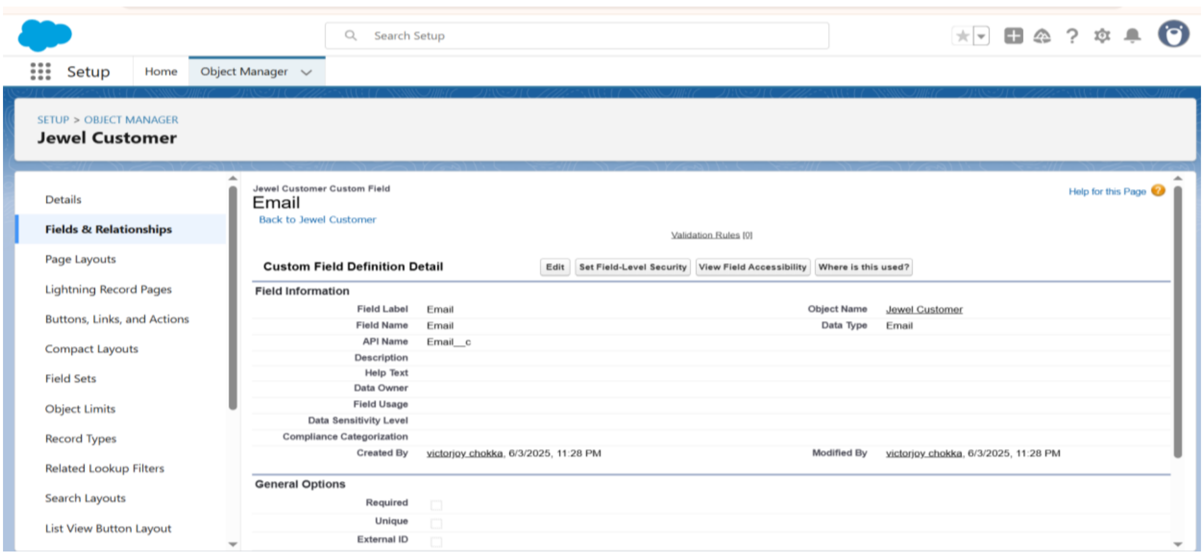
To create fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Jewel Customer) in quick find bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as “Phone” and click Next.
4. Given the Field Label as “ Phone”.
5. Field Name will be auto populated, and click on Next? Next >> Save & new.



To create fields in an object:

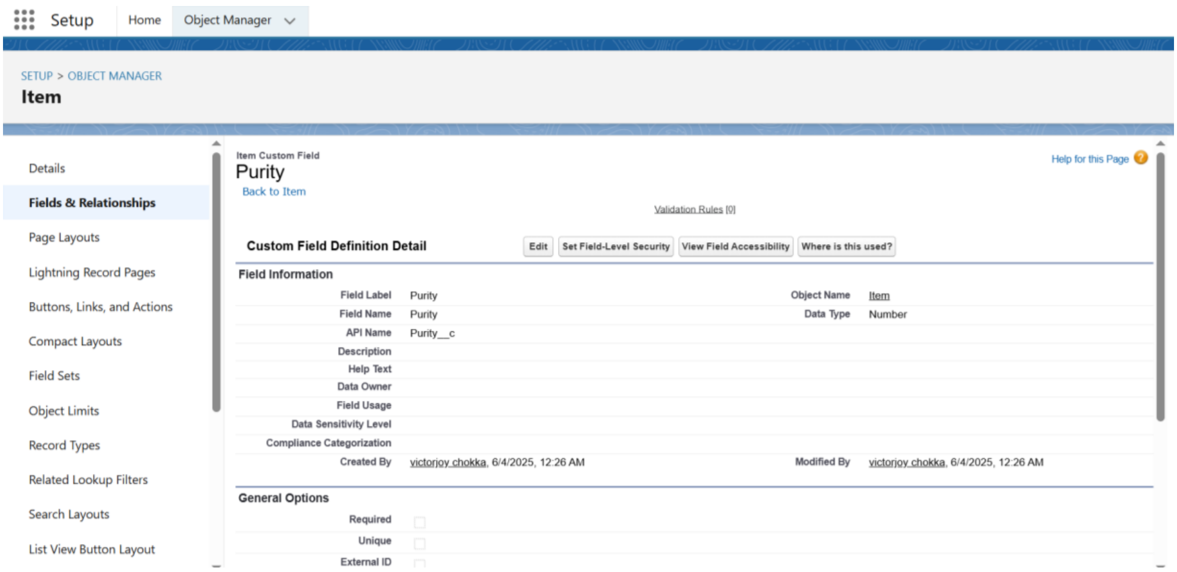
1. Go to setup >> click on Object Manager >> type object name(Jewel Customer) in quick find bar >> click on the object.
2. Now click on "Fields & Relationships" >> New
3. Select Data type as "Email" and click Next.
4. Given the Field Label as " Email".
5. Field Name will be auto populated, and click on Next >> Next >> Save.



Creating the number field in Item object

To create fields in an object:

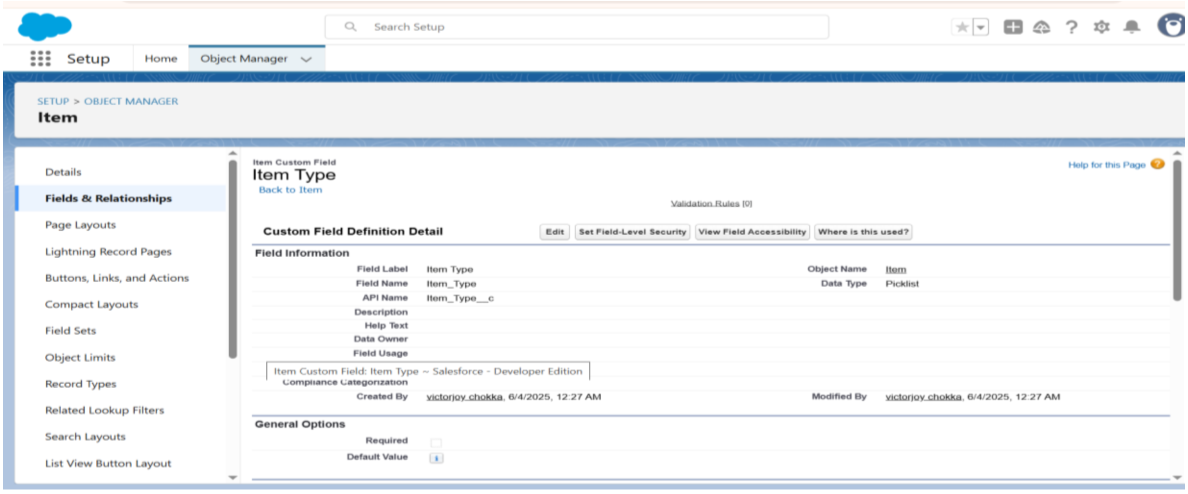
1. Go to setup >> click on Object Manager >> type object name(Item) in quick find bar >> click on the object.
2. Now click on "Fields & Relationships" >> New
3. Select Data type as "Number" and click Next.
4. Given the Field Label as " Purity" and length as " 2 ".
5. Field Name will be auto populated, and click on Next >> Next >> Save.



Creating Picklist Field in Item Object

To create fields in an object:

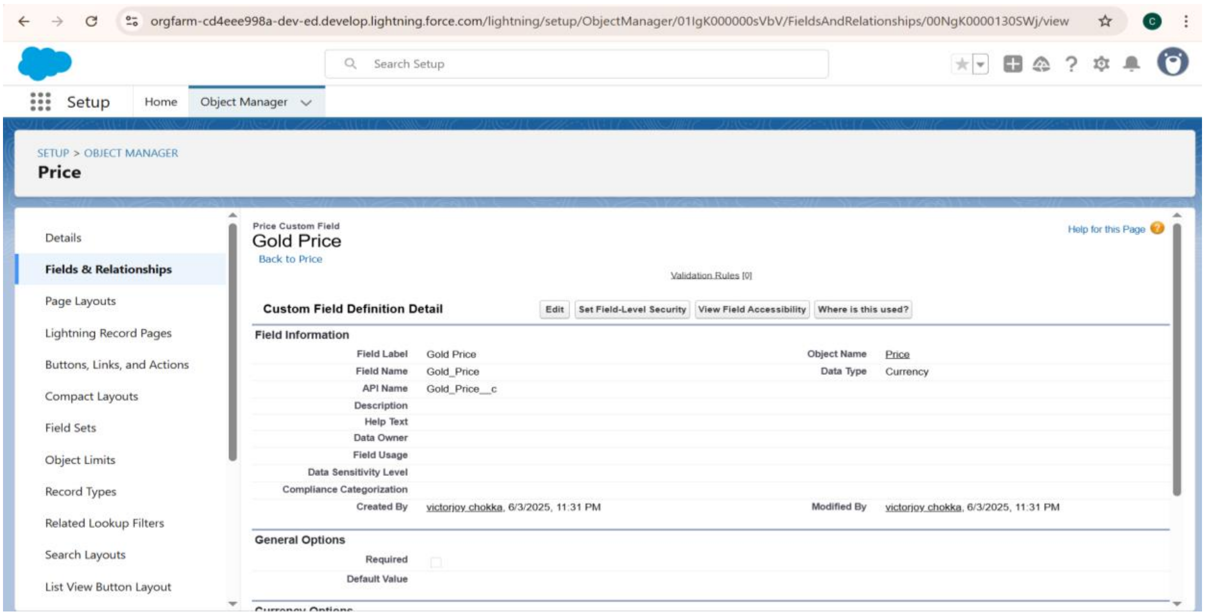
1. Go to setup >> click on Object Manager >>type object name(Item) in quick find bar >> click on the object.
2. Now click on "Fields & Relationships" ? New.
3. Select Data type as "Picklist" and click Next.
4. Enter Field Label as "Item Type".
5. In values select "Enter values(Gold,Silver), with each value separated by a new line" and enter values as shown below.
6. Click Next >> Next >> Next >> Save .



Creating Currency Field in Price Object

To create fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Price) in quick find bar >> click on the object.
2. Now click on “Fields & Relationships” >> New.
3. Select Data type as “Currency” and click Next.
4. Enter Field Label as “Gold Price” and length as “ 8”and decimal 5.Field name will be auto generated.
5. Click Next >> Next >> Next >> Save .

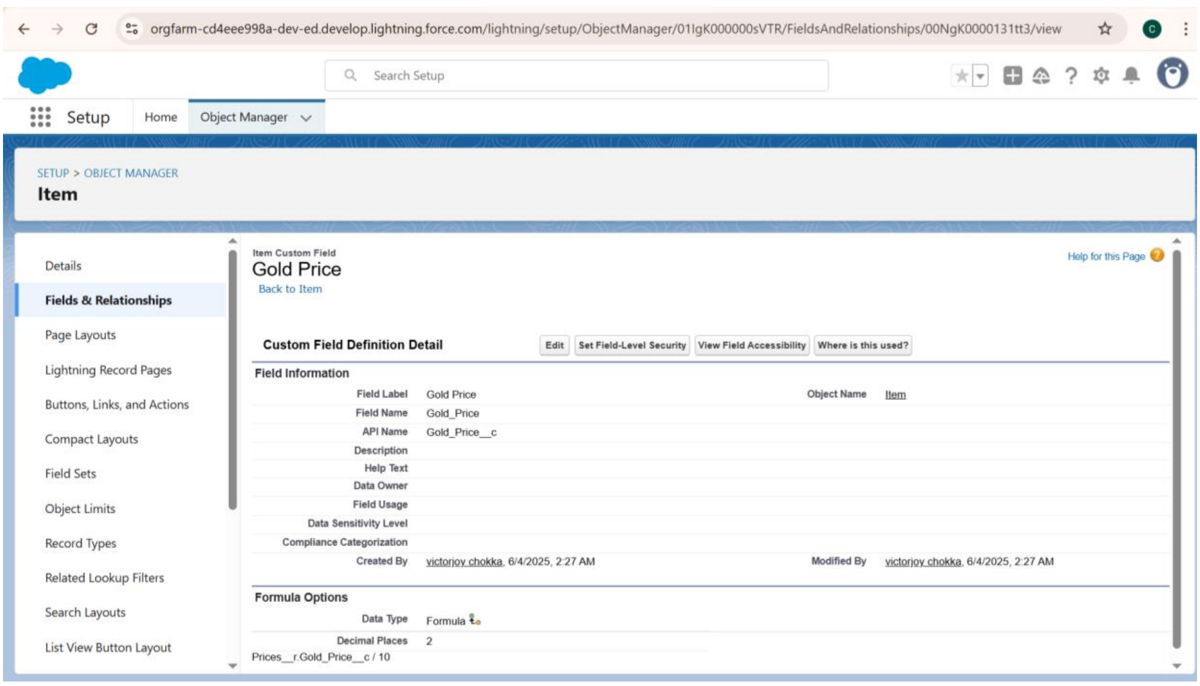


Creating Formula Field(Cross Object) in Item Object

To create fields in an object:

(Note: Create a Lookup Relationship in Item Object to Price Object with Field Name: Prices)

1. Go to setup >> click on Object Manager >> type object name (Item) in quick find bar >> click on the object.
2. Now click on "Fields & Relationships" >> New.
3. Select Data type as "Formula" and click Next.
4. Give Field Label and Field Name as "Gold Price" and select formula return type as "Currency" and click next.
5. Under Advanced Formula write down the formula : Prices__r.Gold_price__c /10.
6. Click "Check Syntax" and Next >> Next >> Save & New.

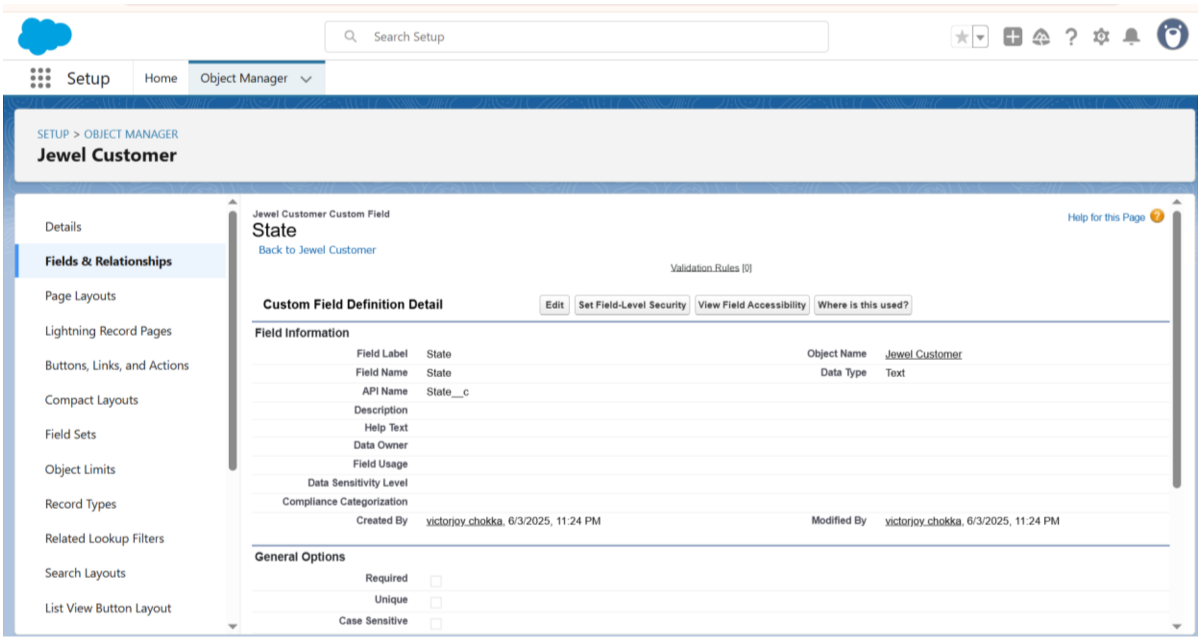


Creating Text Field in Jewel Customer Object

To create fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Jewel Customer) in quick find bar >> click on the object.

2. Now click on "Fields & Relationships" >> New
3. Select Data type as "Text".
4. Click on Next
5. Fill the above as following:
   - Field Label: State
   - Length : 20
   - Field Name : gets auto generated
   - Click on Next >> Next >> Save and new.



Creating Text Field in Jewel Customer Object

To create fields in an object:

1. Go to setup >> click on Object Manager >> type object name (Jewel Customer) in quick find bar >> click on the object.
2. Now click on "Fields & Relationships" >> New

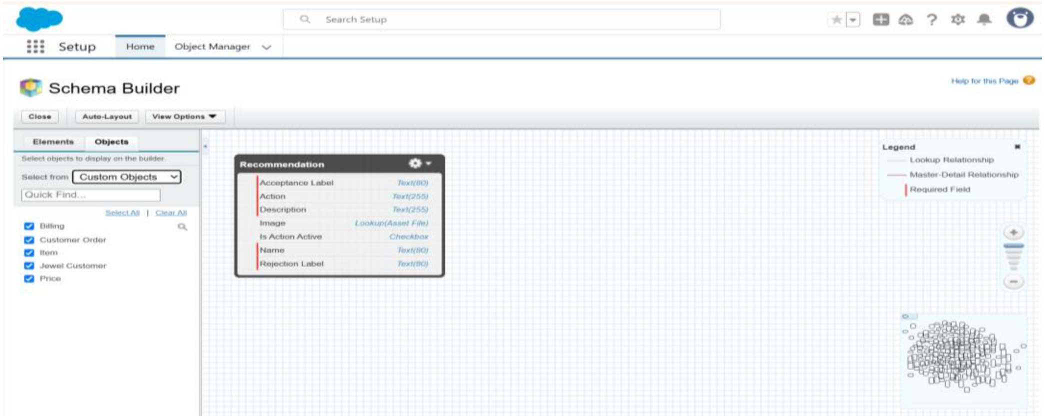
Schema Builder

Schema Builder is a powerful tool within Salesforce that allows you to visualise, explore, and design the relationships between objects in your Salesforce organisation. It provides a graphical representation of the data model, making it easier to understand the structure and connections between different objects.

Creating Schema Builder

1. Go to setup >> click on Object Manager >> Schema Builder.

2. Select objects >> Enter Objects as “Jewel Customer,Item,Customer Order, Price, Billing objects” in quick box and select them.

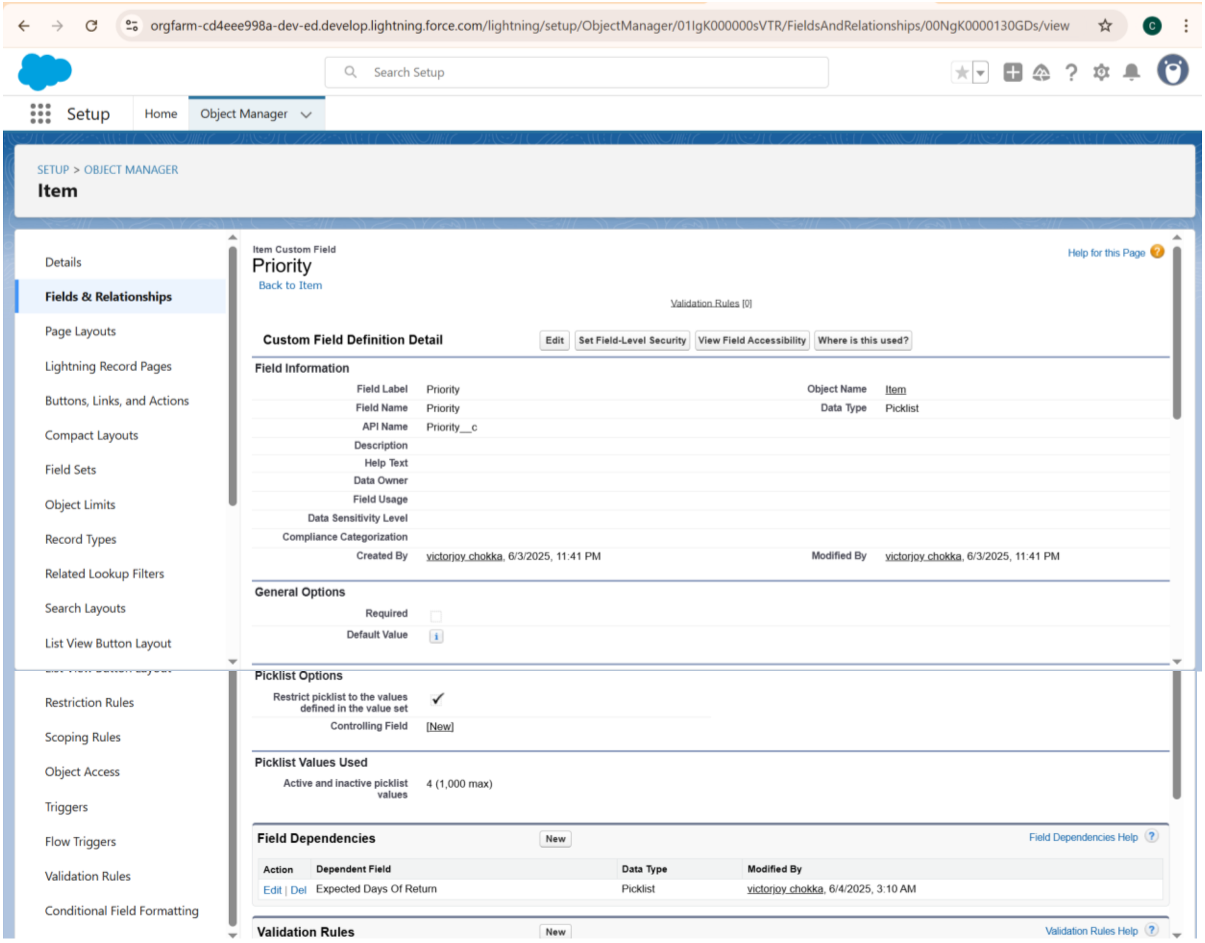


Creating the Field Dependencies

Use case:

Field Dependencies are used to create relationships between fields within an object. They allow you to control the visibility and availability of fields based on the values selected in other fields.

1. Go to setup >> click on Object Manager >> type object name(Item) in quick find bar >>click on the object.
2. Click on Fields & Relationships and click on the Priority field.
3. Search for Field Dependencies and click on New.
4. Select Controlling Field as “Priority” and Depending field as “Expected Days of Return”? Continue.
5. Select the “Expected Days of Return” values of related Priority values and Click on Include Values >> Save.



Creating the validation rule :

CRM Application For Jewel Management

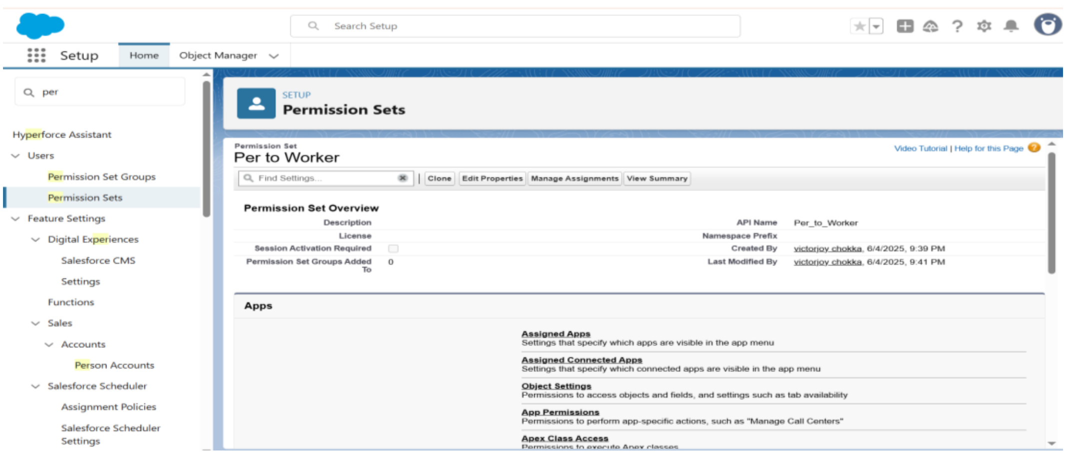
MILESTONE-11

Permission Sets

Creating permission set

A permission set is a collection of settings and permissions that give users access to various tools and functions. Permission sets extend users' functional access without changing their profiles. Users can have only one profile but, depending on the Salesforce edition, they can have multiple permission sets.

1. Go to setup >> type "permission sets" in quick search >> select permission sets >> New.
2. Enter the label name as "Per to Worker", API will be auto populated >> save.
3. Under Apps Select object settings.
4. Click on Items object >> click on Edit >> under Item: Record Type Assignments, enable Gold, Silver >> Object permission check for read ,edit and create.
5. Click on Save.
6. After saving the permission click on the Manage assignment
7. Now click on the Add Assignment.
8. Now select the users which you have created in user milestone, using Worker profile and click on Next >> Assign >> Done.



MILESTONE-12

Trigger

NOTE : create "Paid Amount", "Paying Amount " fields before create trigger.

Creating Currency(Paid Amount) Field in Billing Object

To create fields in an object:

1. Go to setup >> click on Object Manager >> type object name (Billing) in quick find bar >> click on the object.
2. Now click on "Fields & Relationships" >> New.
3. Select Data type as "Currency" and click Next.
4. Enter Field Label as " Paid Amount" and length as " 18 "and decimal" 0 ".Field name will be auto generated.
5. Click Next >> Next >> Next >> Save .

Creating Formula(Paying Amount) Field in Billing Object

1. Go to setup >> click on Object Manager >> type object name (Billing) in quick find bar >> click on the object.
2. Now click on "Fields & Relationships" >> New.
3. Select Data type as "Formula" and click Next.
4. Give Field Label and Field Name as "Paying Amount" and select formula return type as "Currency" and Decimal as " 2 " and click next.
5. Under Advanced Formula write down the formula : Total_Amount__c - Paid_Amount__c
6. click "Check Syntax" and Next >> Next >> Save & New.

Create a Trigger Handler class

Trigger handler:

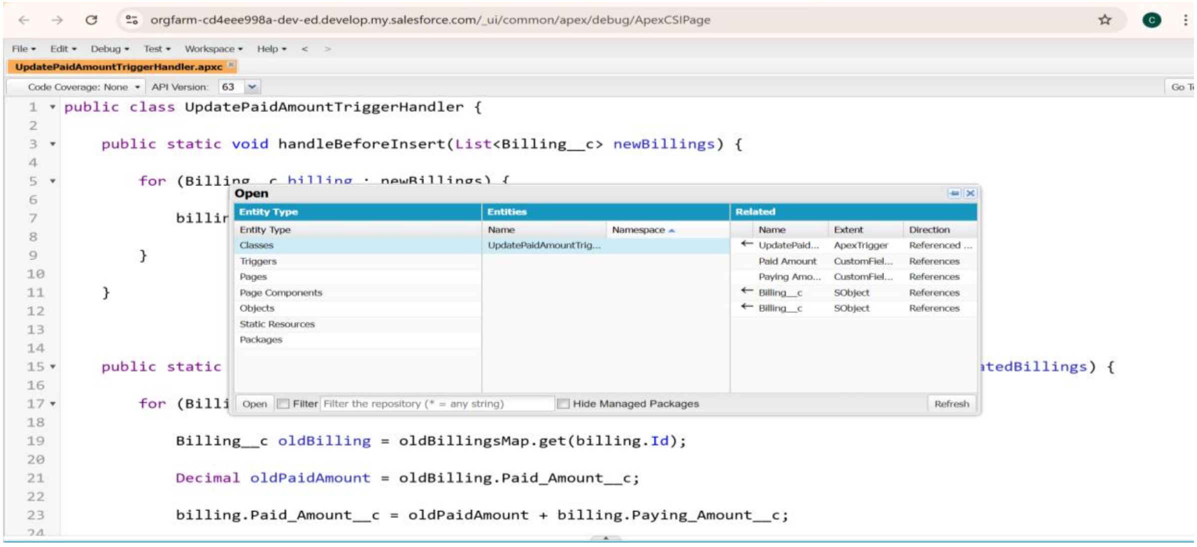
A trigger handler is a design pattern that organises trigger logic into separate classes. This helps in keeping code organised, reusable, and easier to maintain. The trigger handler class contains methods that handle the specific logic for different trigger events, improving code structure and readability. This approach is particularly useful for complex triggers or projects with multiple triggers, as it promotes modular coding practices and reduces the chances of code duplication.

1. Click the Gear icon >> click on Developer Console >> File>>New >>Apex class.
2. Give name for your new Apex class as "UpdatePaidAmountTriggerHandler >>"ok".
3. Paste the code given below.

CODE:

```
public class UpdatePaidAmountTriggerHandler {
    public static void handleBeforeInsert(List<Billing__c> newBillings) {
        for (Billing__c billing : newBillings) {
            billing.Paid_Amount__c = billing.Paying_Amount__c;
        }
    }

    public static void handleBeforeUpdate(Map<Id, Billing__c> oldBillingsMap,
List<Billing__c> updatedBillings) {
        for (Billing__c billing : updatedBillings) {
            Billing__c oldBilling = oldBillingsMap.get(billing.Id);
            Decimal oldPaidAmount = oldBilling.Paid_Amount__c;
            billing.Paid_Amount__c = oldPaidAmount + billing.Paying_Amount__c;
        }
    }
}
```



Create the trigger :

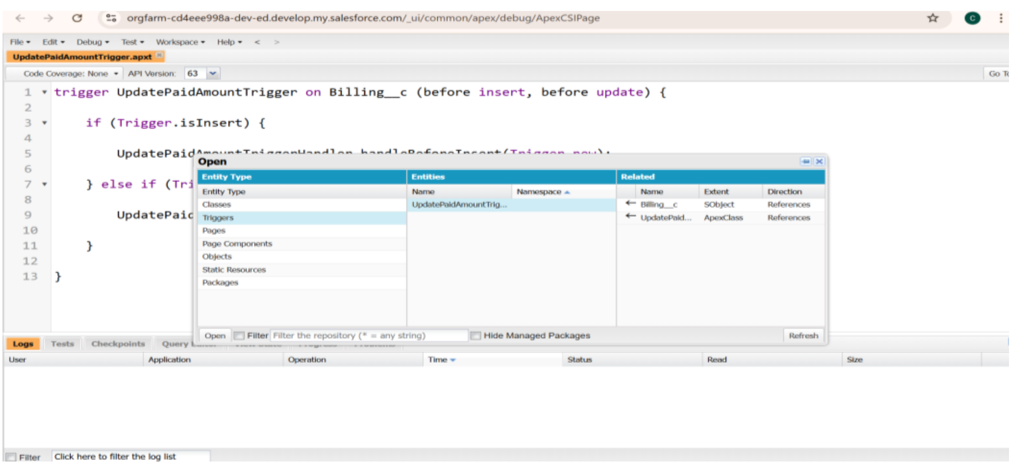
1. Click the Gear icon >> click on Developer Console >> File>>New >>Apex Trigger.

2. Give name for your new Apex class as "UpdatePaidAmountTrigger >>"ok".

3. Paste the code given below.

CODE:

```
trigger UpdatePaidAmountTrigger on Billing__c (before insert, before update) {
    if (Trigger.isInsert) {
        UpdatePaidAmountTriggerHandler.handleBeforeInsert(Trigger.new);
    } else if (Trigger.isUpdate) {
        UpdatePaidAmountTriggerHandler.handleBeforeUpdate(Trigger.oldMap,
Trigger.new);
    }
}
```

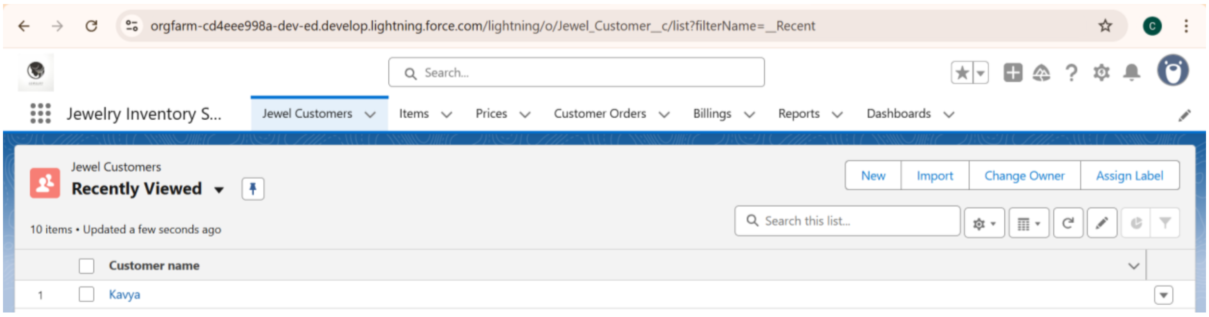


MILESTONE-13

User Adoption

Create a Record (Jewel Customer)

1. Click on App Launcher on the left side of the screen.
2. Search Jewelry Inventory System & click on it.
3. Click on Drop Down and Click on the Jewel Customer tab.
4. Click New.
5. Fill the Details and click on Save.



View a Record (Jewel Customer)
