Project Name	CRM Application for jewel management
Maximum Marks	

CHAPTER-2

IDEATION PHASE

2.1- PROBLEM STATEMENT :

The purpose of this project is to develop a **dedicated CRM application** that empowers jewellery businesses to manage customer relationships, inventory, and sales processes with precision and efficiency. In an industry where personalization, trust, and timely service are paramount, this system aims to:

- **Centralize customer data** to enable personalized service and loyalty tracking
- **Automate inventory and order management** to reduce manual errors and improve operational speed
- **Enhance communication** between customers and staff through integrated messaging and follow-ups
- **Provide real-time insights** into sales trends, customer behaviour, and product performance
- **Support scalability** for growing businesses by offering modular and customizable features

2.2 EMPATHY MAP CANVAS :

An **Empathy Map Canvas** is a powerful tool used in design thinking and user centred development to gain deeper insight into your target audience. It helps teams visualize what a user **thinks, feels, says, and does**, so they can design products and services that truly resonate.

CRM APPLICATION FOR JEWEL MANAGEMENT

EMPATHY MAP CANVAS

Name of Funding Program:	Target Grantee:	Date:	Version:
--------------------------	-----------------	-------	----------

1 WHO are we empathizing with?
Who is the person we want to understand?
What is the situation they are in?
What is their role in the situation?

2 What do they need to DO?
What do they need to do differently?
What jobs do they want or need to get done?
What decisions do they need to make?
How will we know they were successful?

3 What do they SEE?
What do they see in the marketplace?
What do they see in their immediate environment?
What do they see others saying and doing?
What are they watching and reading?

4 What do they SAY?
What have we heard them say?
What can we imagine them saying?

5 What do they DO?
What do they do today?
What behavior have we observed?
What can we imagine them doing?

6 What do they HEAR?
What are they hearing others say?
What are they hearing from friends?
What are they hearing from colleagues?
What are they hearing from second-hand?

7 What do they THINK and FEEL?
PAINS
What are their fears, frustrations, and anxieties?
GOALS
What are their wants, needs, hopes, and dreams?
What other thoughts and feelings might motivate their behavior?

2.3- BRAINSTROMING :

💬 What Might Users Say?

- “I want to track my jewellery purchases easily.”
- “I need reminders for maintenance or cleaning services.”
- “Can I get personalized offers based on my preferences?”

🧠 What Might Users Think?

- “Is this app secure enough for my personal data?”
- “Will I get loyalty rewards for frequent purchases?”
- “I hope the staff remembers my style and past orders.”

👤 What Might Users Do?

- Browse collections frequently but hesitate to buy
- Visit stores after receiving promotional messages
- Share wish list items with friends or family

❤️ What Might Users Feel?

- Excited when discovering new designs
- Frustrated by poor follow-up or stock issues
- Valued when receiving personalized attention

🔍 Brainstorming Techniques You Can Use

Technique	How It Works
Mind Mapping	Start with “Jewellery CRM” at the centre and branch out to features, users, etc.
Brain writing	Team members write ideas silently and pass them around for expansion
Star bursting	Ask “Who, What, Where, When, Why, How” about each feature or user need
SWOT Analysis	Identify strengths, weaknesses, opportunities, and threats of your CRM idea
Reverse Thinking	Ask “How could we make the user experience worse?” to uncover hidden pain points
