CRM Application For Jewel Management

Salesforce

Introduction:

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these questions, then you're in the right place. This module is for you.

Welcome to Salesforce! Salesforce is game-changing technology, with a host of productivity-boosting features, that will help you sell smarter and faster. As you work toward your badge for this module, we'll take you through these features and answer the question, "What is Salesforce, anyway?".

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.

Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud.

So what does that really mean? Well, before Salesforce, your contacts, emails, follow-up tasks, and prospective deals might have been organised something like this:

MILESTONE-2

Object

Create Jewel Customer Object

The purpose of creating a Jewel Customer custom object is to store and manage information about Customer.

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
2. Enter the label name >> Jewel Customer
3. Plural label name >> Jewel Customers
4. Enter Record Name Label and Format
 - Record Name >> Customer name
 - Data Type >> Text
5. Click on Allow reports.
6. Allow search >> Save.

Create Item Object

The purpose of creating a Item object is to manage the inventory of gold and silver items.

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.

CRM Application for Jewel Management

1. Enter the label name >> Item
2. Plural label name >> Items
3. Enter Record Name Label and Format
 - Record Name >> Item Id
 - Data Type >> Auto Number
 - Display Format >> Item-{00}
 - Starting Number >> 1
2. Click on Allow reports.
3. Allow search >> Save.

Create Customer Order Object

The purpose of creating a Item object is to manage the inventory of gold and silver items.

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
 1. Enter the label name >> Customer Order
 2. Plural label name >> Customer Orders
 3. Enter Record Name Label and Format
 - Record Name >> Customer Order No
 - Data Type >> Auto Number
 - Display Format >> Order - {0000}
 - Starting Number >> 1
2. Click on Allow reports.
3. Allow search >> Save.

CRM Application for Jewel Management

Create Price Object

The purpose of creating a Item object is to manage the inventory of gold and silver items.

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.

1. Enter the label name >> Price
2. Plural label name >> Prices
3. Enter Record Name Label and Format

- Record Name >> Item Price
- Data Type >> Text

2. Click on Allow reports.

3. Allow search >> Save.

CRM Application for Jewel Management

Create Billing Object

The purpose of creating a Item object is to manage the inventory of gold and silver items.

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
 1. Enter the label name >> Billing
 2. Plural label name >> Billings
 3. Enter Record Name Label and Format
 - Record Name >>Billing Name
 - Data Type >> Text
2. Click on Allow reports.
3. Allow search >> Save.

CRM Application for Jewel Management

The screenshot shows the Salesforce Setup interface for the Billing object. The browser address bar displays the URL: `orgfarm-cd4eee998a-dev-ed.develop.lightning.force.com/lightning/setup/ObjectManager/01lgK000000sVgL/Details/view`. The page header includes the Salesforce logo, a search bar labeled "Search Setup", and navigation icons. The main navigation bar shows "Setup", "Home", and "Object Manager". The sub-header indicates the current path: "SETUP > OBJECT MANAGER" and "Billing".

On the left, a sidebar lists various configuration options under the "Details" section:

- Fields & Relationships
- Page Layouts
- Lightning Record Pages
- Buttons, Links, and Actions
- Compact Layouts
- Field Sets
- Object Limits
- Record Types
- Related Lookup Filters
- Search Layouts
- List View Button Layout

The main content area, titled "Details", displays the following configuration for the Billing object:

Field	Value
Description	
API Name	Billing__c
Custom	✓
Singular Label	Billing
Plural Label	Billings
Enable Reports	✓
Track Activities	
Track Field History	
Deployment Status	Deployed
Help Settings	Standard salesforce.com Help Window

At the top right of the details section, there are "Edit" and "Delete" buttons.

MILESTONE-3

Tabs

Creating a Custom Tab

To create a Tab:(Customer)

1. Go to setup page >> type Tabs in Quick Find bar >> click on tabs >> New (under custom object tab).
2. Select Object(Jewel Customer) >> Select any tab style >> Next (Add to profiles page) keep it as default >> Next (Add to Custom App) keep it as default >> Save.

To create a Tab:(Item)

1. Go to setup page >> type Tabs in Quick Find bar >> click on tabs >> New (under custom object tab)
2. Select Object(Item) >> Select the tab style >> Next (Add to profiles page) keep it as default >> Next (Add to Custom App) keep it as default >> Save.

CRM Application for Jewel Management

Note: Now create tabs for Customer Order, Price, Billing objects.

The screenshot shows the Salesforce Setup interface for Custom Tabs. The left sidebar contains a search bar with 'tabs' and a list of navigation items: 'User Interface', 'Rename Tabs and Labels', and 'Tabs'. The main content area is titled 'Custom Tabs' and includes a 'Help for this Page' link. Below the title, there is a paragraph explaining that custom tabs can be created to extend Salesforce functionality. The 'Custom Object Tabs' section contains a table with columns for Action, Label, Tab Style, and Description. The table lists five tabs: Billings (Ticket), Customer Orders (Postage), Items (Box), Jewel Customers (People), and Prices (Treasure chest). The 'Web Tabs' section below it states 'No Web Tabs have been defined'.

Action	Label	Tab Style	Description
Edit Del	Billings	Ticket	
Edit Del	Customer Orders	Postage	
Edit Del	Items	Box	
Edit Del	Jewel Customers	People	
Edit Del	Prices	Treasure chest	

Web Tabs

No Web Tabs have been defined

MILESTONE-5

Fields

Creating Lookup Relationship

To Create a relationship between Jewel Customer & Customer Order Objects.

1. Go to the setup page >> click on object manager >> type object name(Customer Order) in the quick find bar >> click on the object.
2. Click on fields & relationship >> click on New.
3. Select "Lookup relationship" as data type and click Next.
4. Select the related object "Jewel Customer".
5. Give Field Label as "Customer" and click Next.
6. Next >> Next >> Save.

The screenshot displays the Salesforce Setup interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The left sidebar shows a list of setup options, with 'Fields & Relationships' selected. The main content area is titled 'Jewel Customer' and shows the 'Customer' field configuration. The 'Field Information' section includes fields for Field Label (Customer), Field Name (Customer), API Name (Customer__c), Object Name (Jewel Customer), Data Type (Lookup), Description, Help Text, and Data Owner. The 'Lookup Options' section shows the field is related to 'Jewel Customer' with a child relationship name of 'Jewel_Customers'. The 'Required' checkbox is unchecked, and the 'What to do if the lookup record' dropdown is set to 'Clear the value of this field'.

Creating a Master-Detail Relationship

Master-detail relationship is a type of relationship between two objects where the master object controls certain behaviours and settings of the detail object. Here are a few use cases that demonstrate the use of master-detail relationships

CRM Application for Jewel Management

Creating Master-Detail Relationship between Item & Customer Order Object.

To Create a Master-Detail relationship :

1. Go to the setup page >> click on object manager >> type object name(Customer Order) in the quick find bar >> click on the object.
2. Click on fields & relationships >> click on New.
3. Select "Master-Detail relationship" as data type and click Next.
4. Select the related object " Item".
5. Give Field Label as "Item" and click Next.
6. Next >> Next >> Save.

The 'Formula Options' section shows the Data Type as 'Formula' and the Decimal Places as '2'. The formula itself is 'Item__r.Amount__c'.

Creating Formula Field in Billing Object

1. Go to setup >> click on Object Manager >> type object name (Billing) in quick find bar >> click on the object.
2. Now click on "Fields & Relationships" >> New.
3. Select Data type as "Formula" and click Next.

CRM Application for Jewel Management

4. Give Field Label and Field Name as "Gold/Silver Price" and select formula return type as "Currency" and Decimal as " 2 " and click next.
5. Under Advanced Formula write down the formula :
IF(ISPICKVAL(Item__r.Item_Type__c ,"Gold"), Item__r.Gold_price__c , Item__r.Silver_price__c)
6. click "Check Syntax" and Next >> Next >> Save & New.

The screenshot displays the Salesforce CRM interface for setting up a custom field. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The left sidebar shows a list of setup options, with 'Fields & Relationships' selected. The main content area is titled 'Billing Custom Field Gold/Silver Price' and includes a 'Back to Billing' link. Below this, there are tabs for 'Custom Field Definition Detail', 'Set Field-Level Security', 'View Field Accessibility', and 'Where is this used?'. The 'Custom Field Definition Detail' tab is active, showing a table of field information. The table includes fields for Field Label, Field Name, API Name, Description, Help Text, Data Owner, Field Usage, Data Sensitivity Level, Compliance Categorization, Created By, and Modified By. The 'Formula Options' section is also visible, showing the data type as 'Formula' and the decimal places as '2'. The formula text is: IF(ISPICKVAL(Item__r.Item_Type__c ,"Gold"), Item__r.Gold_price__c , Item__r.Silver_price__c)

The 'Formula Options' section shows the following configuration:

Data Type	Formula
Decimal Places	2
Formula	Item__r.Stone_Other_Price__c

CRM Application for Jewel Management

Creating Formula Field in Billing Object

1. Go to setup >> click on Object Manager >> type object name (Billing) in quick find bar >> click on the object.
2. Now click on "Fields & Relationships" >> New.
3. Select Data type as "Formula" and click Next.
4. Give Field Label and Field Name as "Total Amount" and select formula return type as "Currency" and Decimal as "0" and click next
5. Under Advanced Formula write down the formula : $\text{Amount_c} + \text{KDM_Charge_c} + \text{Stones_other_price_c} + \text{Making_Charges_c}$
6. click "Check Syntax" and Next >> Next >> Save & New.

Schema Builder

Schema Builder is a powerful tool within Salesforce that allows you to visualise, explore, and design the relationships between objects in your Salesforce organisation. It provides a graphical representation of the data model, making it easier to understand the structure and connections between different objects.

Creating Schema Builder

1. Go to setup >> click on Object Manager >> Schema Builder.
2. Select objects >> Enter Objects as "Jewel Customer,Item,Customer Order, Price, Billing objects" in quick box and select them.

CRM Application for Jewel Management

Creating the Field Dependencies

Use case:

Field Dependencies are used to create relationships between fields within an object. They allow you to control the visibility and availability of fields based on the values selected in other fields.

1. Go to setup >> click on Object Manager >> type object name(Item) in quick find bar >> click on the object.
2. Click on Fields & Relationships and click on the Priority field.
3. Search for Field Dependencies and click on New.
4. Select Controlling Field as "Priority" and Depending field as "Expected Days of Return"? Continue.
5. Select the "Expected Days of Return" values of related Priority values and Click on Include Values >> Save.

CRM Application for Jewel Management

Creating the validation rule :

Creating the validation rule for Postal Code field in Jewel Customer object

Note : check whether the fields mentioned in the formula field are created or not , if not go to activity 10 and create those fields mentioned in Jewel Customer object.

1. Go to setup >> click on Object Manager >> type object name (Jewel Customer) in quick find bar >> click on the object.
2. Click on the validation rule >> click New.
3. Enter the Rule name as "Postal Code ".
4. Insert the Error Condition Formula as :-

```
AND(
  OR(
    LEN( Zip_Postal_code_c ) <> 6,
    NOT(REGEX(Zip_Postal_code_c, "[0-9]{6}$"))
  ),
  NOT(ISBLANK(Zip_Postal_code_c))
)
```

CRM Application for Jewel Management

5. Enter the Error Message as "Must contain 6 digits", select the Error location as Field and select the field as "Zip/Postal code", and click Save.

NOTE:

Create One more Validation rule for Jewel Customer object.

1. Enter Rule name as "ValidationRule For JewelCustomerObject ".
2. Insert the Error Condition Formula as : -

```
OR( ISBLANK( City__c ) , ISBLANK( Country__c ),ISBLANK( Phone__c ),ISBLANK( State__c ),ISBLANK( Street__c )
```
3. Enter the Error Message as "Please fill Required fields", select the Error location as Top of Page and click Save.

CRM Application for Jewel Management

Create Validation rule for Item object.

1. Enter Rule name as "ValidationRule For Item".
2. Insert the Error Condition Formula as : -

OR(ISBLANK(Amount__c) ,
ISBLANK(Customer_Name__c) ,ISBLANK(
Gold_price__c),ISBLANK(KDM__c),ISBLANK(
Ornament__c) ,ISBLANK(Percentage__c
) ,ISBLANK(Making_Charges__c) ,ISBLANK(
Prices__c) ,ISBLANK(Stone_weight__c
) ,ISBLANK(Silver_price__c) ,ISBLANK(
Stone_other_price__c) ,ISBLANK(
Stone_weight__c) ,ISBLANK(Weight__c))

3. Enter the Error Message as "Please fill Required fields", select the Error location as Top of Page and click Save.

CRM Application for Jewel Management

MILESTONE-11

Permission Sets

Creating permission set

A permission set is a collection of settings and permissions that give users access to various tools and functions. Permission sets extend users' functional access without changing their profiles. Users can have only one profile but, depending on the Salesforce edition, they can have multiple permission sets.

1. Go to setup >> type "permission sets" in quick search >> select permission sets >> New.
2. Enter the label name as "Per to Worker", API will be auto populated >> save.
3. Under Apps Select object settings.
4. Click on Items object >> click on Edit >> under Item: Record Type Assignments, enable Gold, Silver >> Object permission check for read ,edit and create.
5. Click on Save.
6. After saving the permission click on the Manage assignment
7. Now click on the Add Assignment.
8. Now select the users which you have created in user milestone, using Worker profile and click on Next >> Assign >> Done.

CRM Application for Jewel Management

MILESTONE-12

Trigger

NOTE : create "Paid Amount", "Paying Amount " fields before create trigger.

Creating Currency(Paid Amount) Field in Billing Object

To create fields in an object:

1. Go to setup >> click on Object Manager >> type object name (Billing) in quick find bar >> click on the object.
2. Now click on "Fields & Relationships" >> New.
3. Select Data type as "Currency" and click Next.
4. Enter Field Label as " Paid Amount" and length as " 18 "and decimal" 0 ".Field name will be auto generated.
5. Click Next >> Next >> Next >> Save .

Creating Formula(Paying Amount) Field in Billing Object

1. Go to setup >> click on Object Manager >> type object name (Billing) in quick find bar >> click on the object.
2. Now click on "Fields & Relationships" >> New.
3. Select Data type as "Formula" and click Next.
4. Give Field Label and Field Name as "Paying Amount" and select formula return type as "Currency" and Decimal as " 2 " and click next.
5. Under Advanced Formula write down the formula : $\text{Total_Amount_c} - \text{Paid_Amount_c}$
6. click "Check Syntax" and Next >> Next >> Save & New.

Create a Trigger Handler class

CRM Application for Jewel Management

Trigger handler:

A trigger handler is a design pattern that organises trigger logic into separate classes. This helps in keeping code organised, reusable, and easier to maintain. The trigger handler class contains methods that handle the specific logic for different trigger events, improving code structure and readability. This approach is particularly useful for complex triggers or projects with multiple triggers, as it promotes modular coding practices and reduces the chances of code duplication.

1. Click the Gear icon >> click on Developer Console >> File>>New >>Apex class.
2. Give name for your new Apex class as "UpdatePaidAmountTriggerHandler >>"ok".
3. Paste the code given below.

CODE:

```
public class UpdatePaidAmountTriggerHandler {  
    public static void handleBeforeInsert(List<Billing__c> newBillings) {  
        for (Billing__c billing : newBillings) {  
            billing.Paid_Amount__c = billing.Paying_Amount__c;  
        }  
    }  
  
    public static void handleBeforeUpdate(Map<Id, Billing__c> oldBillingsMap,  
List<Billing__c> updatedBillings) {  
        for (Billing__c billing : updatedBillings) {  
            Billing__c oldBilling = oldBillingsMap.get(billing.Id);  
            Decimal oldPaidAmount = oldBilling.Paid_Amount__c;  
            billing.Paid_Amount__c = oldPaidAmount + billing.Paying_Amount__c;  
        }  
    }  
}
```

CRM Application for Jewel Management

Create the trigger :

1. Click the Gear icon >> click on Developer Console >> File>>New >>Apex Trigger.
2. Give name for your new Apex class as "UpdatePaidAmountTrigger >>"ok".
3. Paste the code given below.

CODE:

```
trigger UpdatePaidAmountTrigger on Billing__c (before insert, before update) {
    if (Trigger.isInsert) {
        UpdatePaidAmountTriggerHandler.handleBeforeInsert(Trigger.new);
    } else if (Trigger.isUpdate) {
        UpdatePaidAmountTriggerHandler.handleBeforeUpdate(Trigger.oldMap,
        Trigger.new);
    }
}
```

CRM Application for Jewel Management

MILESTONE-13

User Adoption

Create a Record (Jewel Customer)

1. Click on App Launcher on the left side of the screen.
2. Search Jewelry Inventory System & click on it.
3. Click on Drop Down and Click on the Jewel Customer tab.
4. Click New.
5. Fill the Details and click on Save.

View a Record (Jewel Customer)

1. Click on App Launcher on the left side of the screen.
2. Search Jewelry Inventory System & click on it.
3. Click on the Jewel Customer Tab.
4. Click on any record name. you can see the details of the Jewel Customer.

CRM Application for Jewel Management

Delete a Record (Jewel Customer)

1. Click on App Launcher on the left side of the screen.
2. Search Jewelry Inventory System & click on it.
3. Click on the Jewel Customer Tab.
4. Click on Arrow at right hand side on that Particular record.
5. Click delete.

Note:

Create at least 10 records for each of the objects: Jewel Customer ,Price ,Item, Customer Order and Billing.

Reports

Create Report

1. Go to the app >> click on the reports tab.
2. Click New Report.
3. Select report type (Item with Prices) from category or from report type panel or from search panel >> click on start report.
4. Customise your report
 - Add fields from the left pane as shown below.
5. Save or run it.

The screenshot displays the CRM application's 'Reports' section. The top navigation bar includes 'Jewelry Inventory S...', 'Jewel Customers', 'Items', 'Prices', 'Customer Orders', 'Billings', 'Reports', and 'Dashboards'. The 'Reports' tab is active, showing a 'New Items with Prices Report' panel. The panel includes a search bar, a 'Filters' button, and a 'Previewing a limited number of records. Run the report to see everything.' message. The report table has columns: 'Item: Item Id', 'Prices: Item Price', 'Prices: Gold Price', and 'Prices: Silver Price'. The table lists 11 items with their respective prices. The left sidebar shows 'Fields' with 'Groups' and 'Columns' sections. The 'Columns' section lists the selected fields: 'Item: Item Id', 'Prices: Item Price', '# Prices: Gold Price', and '# Prices: Silver Price'.

	Item: Item Id	Prices: Item Price	Prices: Gold Price	Prices: Silver Price
1	Item-04	Nagaradona harshitha	\$10,000.00000	\$15,000.00000
2	Item-10	Nagaradona harshitha	\$10,000.00000	\$15,000.00000
3	Item-01	Kavya	\$1,000.00000	\$2,000.00000
4	Item-09	Singiri Ushasree	\$10,000.00000	\$20,000.00000
5	Item-02	Jampala Hema	\$5,000.00000	\$15,000.00000
6	Item-03	Sandhya	\$7,000.00000	\$3,000.00000
7	Item-08	Karapareddy usha sree	\$5,000.00000	\$20,000.00000
8	Item-05	Akkala Harathi	\$10,000.00000	\$35,000.00000
9	Item-06	D vani	\$5,000.00000	\$4,000.00000
10	Item-07	Dhanasree	\$800.00000	\$2,000.00000
11			\$53,800.00000	\$116,000.00000

Reports

1. Go to the app >> click on the reports tab.
2. Click New Report.
3. Select report type (Billing with Item) from category or from report type panel or from search panel >> click on start report.
4. Customise your report
 - Add fields from the left pane as shown below.
5. Save or run it.

CRM Application for Jewel Management

The screenshot shows a web browser interface for a CRM application. The URL is `orgfarm-cd4eee998a-dev-ed.develop.lightning.force.com/lightning/r/Report/00OgK000002gOG5UAM/view?queryScope=userFolders`. The navigation bar includes 'Jewelry Inventory S...', 'Jewel Customers', 'Items', 'Prices', 'Customer Orders', 'Billings', 'Reports', and 'Dashboards'. The 'Reports' tab is active, displaying a report titled 'Report: Billings with Item' and 'New Billings with Item Report'. The report shows 'Total Records: 10' and 'Total Gold/Silver Price: \$4,336.00'. A table lists 10 items with their respective Gold/Silver Prices.

	Gold/Silver Price
1	\$1,000.00
2	\$15.00
3	\$100.00
4	\$1,000.00
5	\$15.00
6	\$700.00
7	\$500.00
8	\$1,000.00
9	\$4.00
10	\$2.00
11	\$4,336.00

1. Go to the app >> click on the reports tab.
2. Click New Report.
3. Select report type (Item with Customer Orders) from category or from report type panel or from search panel >> click on start report.
4. Customise your report
 - Add fields from the left pane as shown below.
5. Save or run it.

The screenshot shows the same CRM application interface, but with a different report selected: 'Report: Items with Customer Orders' and 'New Items with Customer Orders Report'. It shows 'Total Records: 10'. A table lists 10 items with their respective Customer Order Numbers, Expected Days of Return, and Prices.

	Item: Item Id	Customer Order: Customer Order No	Expected Days Of Return	Prices
1	Item-05	Order - 0005	-	Akkala Harathi
2	Item-01	Order - 0001	-	Kavya
3	Item-02	Order - 0002	-	Jampala Hema
4	Item-03	Order - 0003	-	Sandhya
5	Item-04	Order - 0004	-	Nagaradona harshitha
6	Item-06	Order - 0006	-	D vani

Flows

Create a Flow

1. Go to setup >> type Flow in quick find box >> Click on the Flow and Select the New Flow.
2. Select the Record-triggered flow and Click on Create.
3. Select the Object as a "Billing" in the Drop down list.
4. Select the Trigger Flow when: "A record is Created or Updated".
5. Select the Optimise the flow for: "Actions and Related Records" and Click on Done.
6. Now change the mode from Auto-layout to free-form.
7. Now select the manger option in the toolbox, click New resource.
8. Select the resource type as text template.
9. Enter the API name as " Email body".
10. Change the view as Rich Text >> View to Plain Text.
11. In the body field paste the syntax that is given below.

Hello

Customer Name: {!\$Record.Item__r.Customer_Name__r.Name}

Here are the details for the item you purchased with Jewelry Inventory System

Item Type: {!\$Record.Item__r.Item_Type__c}

Ornament: {!\$Record.Ornament__c}

Weight: {!\$Record.Weight__c}grams

Amount: {!\$Record.Amount__c}

12. Click done.
13. Now click on elements, and drag the action element into the preview pane.
14. Their action bar will be opened in that search for " send email " and click on it.
15. Give the label name as " notice"
16. API name will be auto populated.

CRM Application for Jewel Management

17. Enable the body in set input values for the selected action.
18. Select the text template that was created.
19. Include Recipient Address list, select the email form the record.
({\$Record.Item_r.Customer_Namer.Email_c})
20. Include the subject as "Welcome to Jewelry Inventory System ".
21. Click done.
22. Now drag the path from the start to the action element.
23. Click on save. Given the Flow label , Flow Api name will be auto populated.
24. And click on save and click Activate.

The screenshot shows the Salesforce Flow Builder interface. The browser address bar indicates the URL: `orgfarm-cd4ee998a-dev-ed.develop.lightning.force.com/builder_platform_interaction/flowBuilder.app?flowId=301gK000008eubZQAQ`. The flow is titled "Jewel Management - V1" and was last saved on 6/5/2025, 02:21 PM. The status is "Active".

The interface includes a "Toolbox" on the left with categories: Elements, Manager, Interaction (3), Logic (6), and Data (4). The "Interaction" category is expanded, showing "Action", "Subflow", and "Custom Error". The "Logic" category shows "Assignment", "Decision", "Loop", "Transform", "Collection Sort", and "Collection Filter". The "Data" category shows "Create Records" and "Update Records".

The main canvas displays the flow diagram. It starts with a "Start" event (Record-Triggered Flow) for the object "Billing". The trigger is "A record is created or updated". Below the trigger, there is a "Run Immediately" button. The flow then proceeds to an "Action" element labeled "notice".

The bottom of the screen shows the Windows taskbar with various application icons and the system clock indicating 08:13 PM on 08-06-2025.
